DESCRIPTION OF PROPOSED WORKS

The water can be taken out by a ditch, running almost to the level State manner in which water is to be diverted, whether by dam or other works, whether through pipes, ditches, flumes, or other conduits. If water of creek, needs only a small obstruction in stream to raise it is to be stored in reservoirs it should be so stated and the location of the reservoir should be given with reference to the legal subdivisions. to ditch level, thence through ditch about 5/8 mile to Red Mountain Creek via said creek to a natural reservoir on my land situated on NE $\frac{1}{4}$ of NE $\frac{1}{4}$ and SE $\frac{1}{4}$ of NE $\frac{1}{4}$ Sec. 23, or I could by operating with Boyle, take it out by his ditch, which runs through my land or I could take it out above or below Boyle's diversion point.

5. Estimated cost of works About 250 or 300 dollars.
6. Estimated time required to construct works One month.
7. Remarks If I had permit this year, I could irrigate 600 acres or more on waste water alone.
